# Final fantasy tactics class guide

Final fantasy tactics a2 class guide. Final fantasy tactics advance class guide.

It does good damage, has immense range, and is based on speed, so a fast character equipped with a spear can do quite well by using Jump as their long-ranged attack option. It's good when combined with Jump, as Jump deals more damage when equipped with a spear but you'll get roughly the same damage increase by using Attack Boost, which would also affect any other skills. I like to use it on Balthier. The good news is you only actually need Horizontal Jump 8 and Vertical Jump 8, as unlocking those automatically unlocks all the lower level skills (not on the menu, but in terms of how the skill actually functions). Moveset: Jump + Final Fantasy Tactics Dragoon Ability Name: Jump Cost: Horizontal Jump 2150, Horizontal Jump 3350, Horizontal Jump 4550, Horizontal Jump 5800, Horizontal Jump 61100, Vertical Jump 2100, Vertical Jump 3250, Vertical Jump 4400, Vertical Jump 5550, Vertical Jump 6700, Vertical Jump 71000, Vertical Jump 81500. Jump is actually pretty decent. You can also follow the Bright Rock Media YouTube channel for periodic updates on what's going on with the site. Be sure to follow Bright Rock Media on Twitter to stay up to date with the latest articles, reviews and game guides. Dragoon Final Fantasy Tactics (FFT) Final Fantasy Tactics Dragoon Quick FAQ Dragoon requires Thief level 4 to unlock. That about covers it for the Final Fantasy Tactics Dragoon Class. The most useful thing about Dragons, ultimately, is unlocking the Samurai class. Movement Abilities: Final Fantasy Tactics Dragoon Ability Name: Jump Cost: Ignore Elevation 700. Well, this skill invalidates all of the Jump + X skills, because it's Jump + Infinity. So, ultimately, if you like this skill (or any of the Jump + X skills), get Teleport instead. Support Abilities: Final Fantasy Tactics Dragoon Ability Name: Jump Cost: Equip Polearms 400. Like most of the Equip skills, Equip Polearms is not particularly useful.
